Samsara Networks Inc develops Internet connected sensor system products that combine plug-and-play sensors, wireless connectivity and cloud-hosted software. The fully-wireless sensors are flexible and easy to deploy, while extensible software can capture hundreds of metrics, bringing visibility and insight into any operation. Samsara provides secure cellular connectivity, built in, that connects out of the box with no SIM cards to provision, carrier contracts to negotiate, or data fees to manage. In addition, Samsara's cloud-hosted architecture simplifies deployment for projects of all sizes while its advanced analytics engines provide deep visibility and insights into operations.
