FKA: SafeChannel, Inc, the company develops Security as a Service platform. With its multi-tenant, distributed cloud security platform, Zscaler effectively moves security into the internet backbone, enabling organizations to fully leverage the promise of cloud and mobile computing with unparalleled and uncompromising protection and performance. Zscaler delivers unified, carrier-grade internet security, next generation firewall, web security, sandboxing/advanced persistent threat (APT) protection, data loss prevention, SSL inspection, traffic shaping, policy management and threat intelligence—all without the need for on-premise hardware, appliances or software.
